Projects

EMI Calculator (Python, Flask)

Developed a web-based EMI Calculator using Python and Flask that calculates monthly EMI, total interest, and total repayment based on loan details. Designed a responsive and user-friendly interface to provide accurate financial calculations and simplify loan planning.

Civic Wall & Civic Scope (Design Thinking Project)

Designed a citizen engagement platform that allows users to report, discuss, and track local civic issues such as waste management and infrastructure. Applied the design thinking methodology through user research, problem analysis, prototyping, and testing to improve civic participation and government accountability.

AI Internship Recommendation System (React,Flask,Machine)

Developed an AI-powered internship recommendation system that suggests suitable internship opportunities based on users' skills, interests, and academic background. Built the application using Python and Flask with machine learning techniques to provide personalized recommendations through a simple and interactive web interface.
